TARIFF FORMAT

- A. **Sheet Numbering** – Sheet numbers appear in the upper right corner of the sheet. Sheets are numbered sequentially. However, occasionally, when a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. **Sheet Revision Numbers** – Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd Revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in their tariff approval process, the most current sheet number on file with the Commission is not always the sheet in effect. Consult the Check Sheet for the sheet currently in effect.
- C. **Paragraph Numbering Sequence** – There are four levels of paragraph coding. Each level of code is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.1.
- D. **Check Sheets** – When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff with a cross-reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest Check Sheet to find if a particular sheet is the most current on file with the Commission.

SECTION 4 – INTEREXCHANGE SERVICE DESCRIPTIONS AND RATES**4.1. GRANITE INTEREXCHANGE TELECOMMUNICATIONS SERVICES**

4.1.1. The Company provides interexchange services throughout the Commonwealth of Kentucky.

4.1.2. Service Descriptions

Company provides a switched telecommunications service which allows a customer to establish a communications path between two stations by using uniform dialing plans.

4.1.2.1. **Granite Switched Access Service** is a switched access service, offering users outbound 1 plus and inbound, long distance telecommunications services. Rates are based on the subscribers' cumulative monthly long distance billing.

4.1.2.2. **Granite Dedicated Access Service** is a dedicated access service, offering users both outbound 1 plus and in bound, long distance telecommunications services over dedicated local access connections to the carriers' point of presence. This service is designed for subscribers with high traffic volumes, whose traffic volumes justify the additional costs of dedicated access facilities.

4.1.2.3. **Granite Travel Card** is a calling card service enabling Switched Access Service subscribers to place calls from any touch tone phone in the U.S. Travel Card calls are billed at the Company's rates and appear on the subscriber's monthly long distance bill.

4.1.2.4. **Granite Prepaid Calling Card Service** is a discretionary switched access service available to subscribers via a toll free number from any telephone in the United States. The user's account is credited for the amount of calling purchased and is debited as the subscriber places calls, until the account balance is depleted. Subscribers are informed of the amount of calling time remaining on the card at the time they access the Company's equipment and enter a card identification number and are reminded to replenish the account prior to its depletion at one (1) minute prior to the account's depletion. Subscribers may immediately replenish the account at any time by contacting the Company's customer service department and charging the desired amount to a valid credit card or by mailing a check to the Company. If the account is not replenished, access to the Company's underlying carrier network is blocked.
